**STEBER****43****What are your Boating Priorities?****Smooth Water Performance or  
Ocean Going Ability?****Style or Practicality?****Luxury or Safety?****Require all these Characteristics?**

Then the latest release Steber 43' has been designed and built with you in mind!

The Steber 43' has the unsurpassed ability to combine all six distinctive features, and has culminated in a vessel which endured the rigorous assessment of the Australian Design Council, to achieve the ultimate status of the Australian Design Award. This accolade recognises the level of designed excellence, in all aspects of the products' design process, including manufacturing, product technology, consumer benefits, ergonomics, safety and aesthetics.

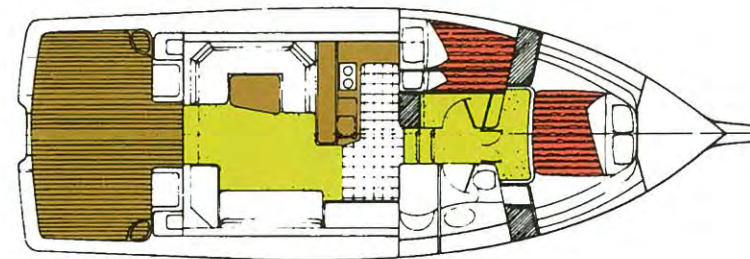

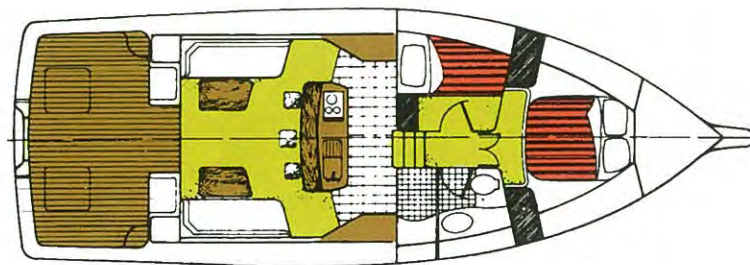

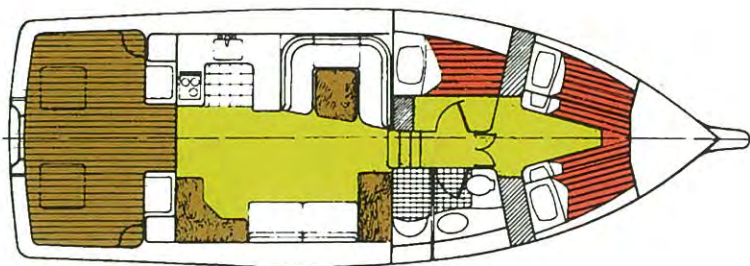

Considered one of Australia's most competent boat builders, Stebercraft have designed and built the 43' Performance Cruiser to comply with the AS 3902 Quality Standards, used to manufacture all the vessels in the Steber range....

Not only does this boat look great, with its bold profile and its distinctive contemporary lines, it "goes great" too. "The Steber 43' is a stylish, dry boat which is sea kindly".

Engineering excellence, quality finish, attention to detail, combined with the customer selection of decor appointments produce a boat to satisfy your practical requirements and personal style.

The Steber 43' is not a "Budget Boat" - it does however exemplify value for money - a vessel to be DESIRED as a "world class vessel which is robust", APPRECIATED for "an excellent fit of major mouldings" and RESPECTED for its "first class engineering detail". VALUED for its durability and CONSIDERED for its affordability. A vessel to be owned by those who recognise design excellence and protection for their investment.

*(Quotation from Product Citation Australian Designmark).*

In a constant endeavour to improve the product, Stebercraft reserves the right to alter specifications at any time. For commercial use these vessels can be manufactured to Maritime Services Board Survey Requirements (All States).
