# Why Steber owners become bores

**They simply won't stop talking. Boasting about their boat.** So what is it that makes normally modest men become such boasters? Ask one about his new Steber craft and you'll soon find out.

He'll start with the hull, for sure. Clinker fibreglass, like all Steber craft. And he'll explain that it's the clinker design that gives Steber its soft, cushioned ride. Then he'll enthuse about the wide beam, the great flare of bow and the fine entry at the waterline that combine to give Steber more comfort, more performance, more safety on the water. And by the time he gets on to the hardware, the deck fittings, the thoughtful attention to small details . . . you'll want to shout "Who the hell are these Steber people anyway? What makes them so special?"

His answer? Steber have only been building boats for twenty seven years. They make a complete range of quality craft from twelve to eighteen footers. They have a reputation for fine workmanship. And Steber build each boat as complete as possible, yet still have hosts of optional features to suit every fisherman, skier and family man.

Bore or not, you'll reckon he certainly knows his boats. However, we only create a few new Steber bores each week.

We can't build enough Steber boats for everyone. So you can probably avoid at least one bore in two.

Or you can get caught up with the enthusiasm and become a Steber bore yourself. What Steber craft have to offer boating, is far from boring.

 **STEBER**
