Description

The Steber/Precision 58/65 stands among Australia’s most respected game fishing sports cruisers, renowned for its precision engineering, proven offshore capability, and uncompromising build quality. Developed to meet the expectations of serious operators and passionate anglers alike, each vessel is custom-built to suit the individual owner’s requirements, resulting in a highly personalised and purpose, driven platform.

Over more than a decade of service, the model has earned an outstanding reputation for reliability, performance, and long-term durability. Construction, engineering, and electrical systems are all executed to full survey standards, allowing the vessel to be configured for either high-end recreational use or demanding commercial operations.

The hull design itself is thoroughly proven in challenging offshore conditions and continues to demonstrate exceptional sea-keeping and efficiency. Building on this success, the platform is also being adapted with a commercial superstructure option, opening the door to a wide range of professional applications including Police, Customs, Fisheries, Rescue, charter, diving, and tourism operations.

Robust, versatile, and highly respected in the field, the Steber/Precision 58/65 represents a serious offshore asset built to perform and built to last.
