

Introducing
THE NEW STEBER
1050 SERIES

SUPER SEDAN

BEAUT UTE

1050 SERIES

At Stebercraft, the emphasis is "customer focused", as it has been for the past 50 years.

Our commercial vessels have enjoyed one of the best service records in the industry, & our pleasure boats have continued to validate our reputation for unrelenting commitment to quality & contemporary designs.

Stebercraft utilise the finest raw materials & hardware, as used in the international commercial boating industry. Fibreglass components are laminated to the most stringent standards, enhancing both safety as well as longevity of your boating investment.

Stebercraft boats have evolved over 50 years of boat building expertise, to become one of the most tested & engineered vessels produced in Australia, & have justifiably been recognised with numerous industry & independent awards also ISO 9002 Certification (accreditation Jan 1997).

The latest 10.5 metre Stebers are to be released in conjunction with our 50th Anniversary. They offer a host of innovations inside & out.

Steber boats aren't born to live life tied up to a marina - they deserve to be afloat on the oceans of the world, & the newest model 1050's are no exception.

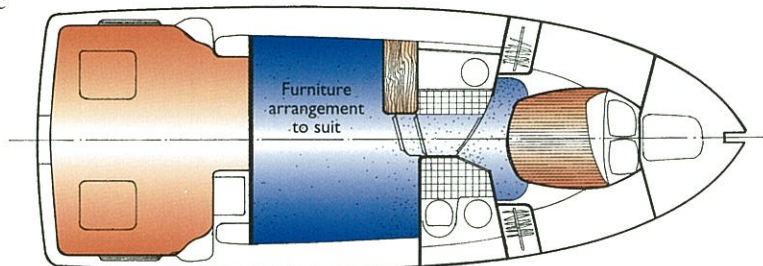

1050 SEDAN

This family styled cruiser has aesthetically pleasing aerodynamic smooth surfaces, offering the benefit of "water shedding" & design strength.

The new 1050 Sedan is spacious, comfortable & equipped to make your boating hours safer, more pleasurable & low maintenance. It is a boat appropriate for river rambling, lake languishing & blue water basking.

The level of standard inclusions & built-in features means options simply shouldn't be necessary.

Note: Anchor retrieving device, modern profile, large deep cockpit, stylish flybridge etc.

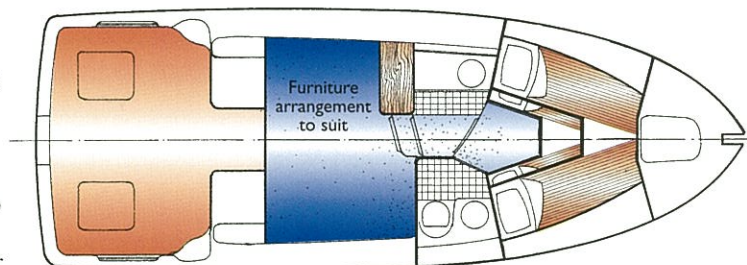

1050 UTILITY

If you are looking for a boat where you can see and feel the difference, the 1050 Ute is unique. It will stand apart from others, in performance & function.

Hundreds of hours have gone into designing the "utility" bridge concept, even before refining it for production.

The Steber 1050 Ute is a boat designed to "get the job done" whether that be serious business or just having fun. It offers a substantially deeper & more purposeful cockpit. The hull shape, as in its sedan counterpart gives excellent stability & safety.

Upon release the Ute will present a range of features most other boats only offer as options.
